

[FAN MODULE]

Abstract

A fan module comprising a housing, a fan and a plurality of fins is provided. The housing has a mounting space, an air inlet and a corresponding air outlet. The mounting space links the air inlet to the air outlet. The fan is installed within the mounting space. The fins are aligned in parallel and fitted inside the air outlet. The fins divide the air outlet into a plurality of parallel slots, each of which has width less than or equal to 1mm.
